

QUIDDITY CONSULTING

Your Trusted Partner for Comprehensive Civil Engineering Solutions

CONSULTING SERVICES

WASTEWATER TREATMENT

Our solutions for wastewater collection and treatment comply with regulations and consider the long-term goals of the community.

WATER DISTRICT SERVICES

We tailor water district services to individual client needs, demonstrating responsible stewardship of public funds, and focusing on infrastructure design and financial planning.

WATER SUPPLY & TREATMENT

Our water supply and treatment engineers are equipped to solve your community's water challenges, managing water infrastructure effectively.

TRANSPORTATION

Our team is committed to keeping your community moving, from concept to concrete. Our expertise ranges from building, maintaining, and repairing transportation infrastructure, including roads, bridges, and more.

TRAFFIC

Our traffic engineers utilize big data and modeling software to design solutions that prioritize safety and mobility in your community, delivering traffic signal design and traffic impact analysis expertise.

HYDROLOGY & HYDRAULICS

Our dedicated team ensures effective and innovative drainage solutions to protect against the effects of wet weather events. Whether it's urban drainage improvements or regional flood control projects, we're committed to providing reliable solutions.

PERMITTING

Our experienced team manages a range of permitting services, including MS4, Wastewater Permitting, and IUPP, ensuring regulatory compliance and safeguarding community interests, in addition to legal services related to land use.

PROGRAM MANAGEMENT

Our program managers, through integrative technology and communication, act as an extension of your team to increase efficiency and improve the overall outcome of your project, ensuring it stays on schedule and budget.

ELECTRICAL ENGINEERING

We prioritize safe, dependable, and efficient electrical systems, which are the foundation of a successful project. Our expertise encompasses electrical engineering and SCADA systems to ensure reliability.

SURVEYING SERVICES

Our survey crews use advanced technology, including drone surveying, GIS, and laser scanning, to provide accurate and efficient plats, boundary surveys, and construction staking services.

SITE CIVIL SERVICES

Our site civil engineers provide comprehensive site development services, including site improvements, entitlements, and permitting services, ensuring your project reaches the finish line.

SINGLE-FAMILY DEVELOPMENTS

Our civil engineers specialize in creating award-winning communities, from master-planned communities to single-family neighborhoods, using innovative land planning and site design techniques.

LAND PLANNING

Our land planning engineers bring your vision to life, strategically locating structures, streets, and drainage facilities in accordance with zoning and land use regulations, contributing to the well-being of the community.
